

IP1100-1102

AIC

IP1100 NAS/iSCSI Appliance

Features

- NAS/iSCSI functionality with ten(10) SFF SATA disks support
- Support RAID levels 0, 1, 5, 6 with Email Notification
- 4x 1Gbps GbE host ports, with 2x 3Gbps eSATA expansion
- Web based Storage Management GUI for remote access
- Hardware monitoring over ethernet for drive, CPU, RAID, etc.
- Event Notification through SNMP

2 x Front-Access GbE Ports

Dimensions (W x D x H)
(with chassis ears/protrusions)

mm : 482.6 x 482.6 x 44.4
inches : 19 x 19 x 1.75

IP1100 series NAS/iSCSI appliance offers both NAS & iSCSI hybrid functionalities in a single system, providing users unparalleled flexibility by centralizing both file and block-level storage through IP network.

Based on the 45nm Next-Generation Intel® Atom™ Microarchitecture, AIC's IP1100 series NAS/iSCSI RAID appliance is a cost effective and power efficient IP-storage solution with targeted performance and low power consumption.

▲ Unified File and Block-level Storage

- Support NAS and iSCSI functionality in a single system.
- IP based storage management combines NAS & iSCSI functionality for centralized storage and storage consolidation.

▲ Cost Effective & Environmental Friendly

- File sharing, backup & recovery, storage consolidation, disaster recovery.
- Remote replication at block or volume level enables cost-effective disaster recovery.
- Power-efficient solution with Intel® Atom™ processor - the world's smallest size and lowest power processor.

▲ Ease of Management

- Web based Graphical User Interface (GUI) provides a centralized view of all data under management, adding efficiency and security over the web.
- Hardware monitoring over Gigabit Ethernet, for disk drives, CPU, memory, and more.

▲ Flexibility and Reliability

- Heterogeneous support for a broad range of network environment and protocols allowing data to be easily shared among different platforms.
- Reliable disk based backup and recovery, along with Snapshot capability enable fast and reliable backup and restore.

SPECIFICATIONS

GENERAL

RAID Engine	Open-E® DSS Software RAID
Storage Processor	Dual Core Intel® Atom™ Processor 330 1.60 GHz, 533 MHz FSB, 1M Cache
Hybrid Technology	NAS/iSCSI
Host Interface	Quad GbE ports (2 x front + 2 x rear)
Expansion Interface	2x eSATA
Memory	1G DDR2 533/667MHz SO-DIMM up to 4GB (2 x 2GB)
Drive Support	10 x 2.5" SATA

FUNCTIONALITY

NAS Features	SMB/CIFS, FTP, Secure FTP, HTTP, Apple Talk, NFS v2/v3 Window Active Directory / Primary Domain Controller
iSCSI Features	IP Address restriction for a Target, CHAP user Management, MPIO Support

ADMINISTRATION / MONITORING

Graphical User Interface	Web-based
Monitoring	Hardware, SNMP (v2, v3), Email Notification, Log Function

MANAGEMENT

Network Management	DHCP Client, Multiple Network, Interface Card Support, Teaming/Bonding (including Adapter Fault Tolerance), Proxy Setting, IP-sec, Jumbo Frame Support
Storage Management	Software iSCSI Initiator, Software RAID 0, 1, 5, 6 with Email Notification, Volume Support (2TB Physical & Logical, 16TB Logical) Multiple Snapshot, Multiple Logical Volume & Groups, Online Logical Volume Expansion, Support for Online Logical Volume Expansion, Volume Replication

OS SUPPORT

Supported Network Clients	Microsoft Windows, Unix, Linux, Mac OSX
Supported File Protocol	SMB/CIFS, FTP, Secure FTP, HTTP, Apple Talk, NFS v2/v3/v4

ELECTRICAL & ENVIRONMENTAL

Power Supply	300W 1+1 hot-swap Redundant PFC
Universal A/C Input	100VAC ~ 240VAC

PHYSICAL SPECIFICATION

Gross Weight	w/ PSU; w/o Rail & Disks	15.5kgs / 34.1lbs
Packaging Dimension (W x D x H)	mm	586 x 734 x 250
Cubic Feet		3.8
Reference Container Loading	20'	250
	40'	515
	40' H	620

Ordering Information

Part Numbers	Descriptions
SSG-IPCA4G0-1100-A1	1U with 300W redundant power supply, 10x2.5 bays
